Animal languages are forms of non-human animal communication that show similarities to human language. Animals communicate by using a variety of signs such as sounds or movements. Such signing may be considered complex enough to be called a form of language if the inventory of signs is large, the signs are relatively arbitrary, and the animals seem to produce them with a degree of volition (as ...

96 Key to get out : ESC The escape key (Esc) was originally used just to control computer peripherals. It was a key that allowed the computer operator to stop what the peripheral was doing (canceled a print job, for example). Nowadays the escape key is used for all sorts of things, especially in gaming programs.

The key question is can the marginal CO2 back radiation due to changing CO2 from 270 preindustrial to 410 current can warm the oceans. 270 PPM = 368.322 W/M^2 410 PPM = 369.264 W/M^2 Difference = 0.94 W/M^2. Do we really think an additional 0.94 W/M^2 can honestly warm the oceans? Also, Mother Nature has natural safety valves.
