The Honda K-series engine is a line of four-cylinder four-stroke car engine introduced in 2001. The K-series engines are equipped with DOHC valvetrains and use roller rockers to reduce friction. The engines use a coil-on-plug, distributorless ignition system with a coil for each spark plug. This system forgoes the use of a conventional distributor-based ignition timing system in favor of a ...

Honda is getting a reputation for creating some rather powerful engines, such as the 2022 Acura MDX unveiled in December that sports a 3.5-liter V-6 engine and the Civic Type R sedan that can create 306 horsepower and 295 pound-feet of torque out of a 2.0-liter, turbocharged four-cylinder engine. But on Tuesday, a Virginia-based company announced its plans to create a V-8 engine that can crank ...
